Can you restate the question? Q. Yeah. Let's step back. You testified that Houlihan Lokey had performed analyses of the expected value of the Tranche A and Tranche B notes under the RSA; is that right? This is a "yes" or "no." A. Yes, we have. Q. Okay. And you've also testified that you performed those analyses at the request of Kramer Levin; is that right? A. That's correct. Q. Okay. Have you performed any analyses of the value of the Tranche A and Tranche B notes that were not at the request of Kramer Levin? A. To the best of my knowledge, we have not. Q. As we've seen, potential weather-related disruption in the provision of electric service. Q. Okay. Others? A. The implementation independent of PREPA of distributed generation at the retail and commercial level. Q. So you believe implementation independent of PREPA of distributed generation would be a positive or a negative for the Tranche A bonds? A. I believe that could potentially be a negative. It would remain it's dependent on a number of factors. Q. Okay. Are there other risks?	4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	bonds I'm sorry. Strike that. Let me take that from the top. Are you aware of other potentially significant risks potentially affecting the PREPA bonds? A. Those are some of the more prominent risks. We could continue the exercise, but I guess I'd stop there unless you want to continue. Q. Well, if we're trying to capture the risk that you view as significant, are there additional risks that you view as significant risks that you haven't mentioned? A. One is the another potentially significant risk is the interrelationship between the Commonwealth and the Federal Government, particularly as that affects funding to municipal agencies like PREPA. Q. Okay. Are there other risks that
